PROJECTS

"Fakealot" – Takealot clone

A clone of the leading ecommerce retailer in South Africa. The user is able to create an account, login, add items to their cart, remove items from their cart as well as log out. Sign-in and Sign-out is handled by firebase authentication.

~Made with React, deployed to firebase~

<https://takealot-clone.web.app/>

Netflix-clone

A clone of the online streaming service Netflix. The site data is pulled from a third party API and displays the relevant information to the user. The user is able to scroll through the genres and view the trailer for the selected series or movie.

~Made with React, deployed to firebase~

<https://netflix-clone-3d128.web.app/>

Concept site for Sunset skim-boards

A concept site for Sunset skim-boards. There is a link to the shop where users can view products and add them to the cart. When items are added to the cart they are stored in local storage for if a user closes the page, the data can be retrieved. Items in the cart can have their quantities increased/decreased and can also be removed from the cart.

~Made with HTML5, CSS3 and JavaScript~

<https://harryminnie6.github.io/Sunset-Skim-boards/>

Weather Application

A weather app that displays the user's current location and weather conditions. It also has an extended four day forecast. The app gets information from a 3rd party API and displays the relevant information to the user.

~Made with HTML5, CSS3 and JavaScript~

<https://harryminnie6.github.io/Weather-app/>

Rock Paper Scissors game

An interactive game of "Rock Paper Scissors" where the user plays against the computer.

~Made with HTML5, CSS3 and JavaScript~

<https://harryminnie6.github.io/Rock-Paper-Scissors/>

To-do list

Created a responsive to-do list that stores to-do items in local storage.

~Made with HTML5, CSS3 and JavaScript~
